DELIVERY AND SETUP OF ENTRIES:

All entrants must physically set up their own scarecrows on Saturday, September 22nd between 10am and 2pm. If entrants cannot bring their scarecrows on that day they must call Yvonne at 209 969-6048 to make special arrangements. All entries must remain in the patch through October 31st, 2018. **Entries must be picked up before Saturday, November 3rd, 2018. If scarecrows are not picked up, they may be thrown away.**

SCARECROW SPECIFICATIONS:

TRADITIONAL ENTRIES:

Dell’Osso Farms will place a 4’ – 5’ high metal fence post in the ground for attaching the scarecrow. The builder of the scarecrow **MUST** provide a method for attaching their scarecrow to the post. A 2” diameter PVC pipe is **STRONGLY** recommended thru the middle of the scarecrow body or the back. This will facilitate the installation on the post to give both structure and stability to your scarecrow and its limbs. If using PVC is not conducive to your design then you **MUST** provide another way to attach your scarecrow to the post. Each scarecrow **MUST** be accompanied by a sign which includes the name of the applicant and other information about the entry that the applicant deems interesting. It is recommended that you identify (with a small tag) your scarecrow.

SIZE LIMITATIONS: All entries should fit within a 5 foot cubic area including all of its extension limbs, width or length. Please contact us before August 31, 2018 if your entry will exceed this space. Typically a taller entry is allowed. The entire structure of the exhibit is considered to be the dimension of the scarecrow entry – not the dimension of the actual scarecrow. All oversized entries will be in a pre-assigned location.

MATERIALS: As all scarecrow entries must remain outdoors until October 31st, 2018 and may be subject to severe wind and/or rain, their construction should be durable and all ornamentation securely attached. Carved pumpkins or other living materials that will not last the duration of the exhibition are discouraged. The ground surface will be dirt so dust will be a factor to consider as well as rain and wind.
